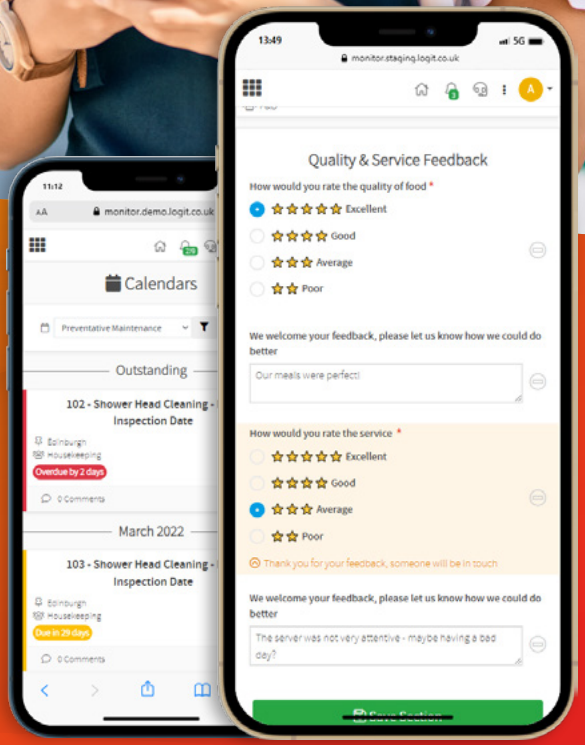
LOGIT

Monitor everything at your fingertips.

Simplify task management with all-in-one solution



Save time, reduce costs and improve performance

Logit is an all-in-one digital solution that enables you to manage compliance, maintenance, audits, food safety and more from any device.

Our easy-to-use software lets you eliminate paperwork and spreadsheets with digital checklists. Logit simplifies audits and makes it easy to manage all your assets and maintenance activities. Seamlessly interact with staff and guests using QR codes to gain insights and make improvements that deliver a better customer experience.

Logit's smart technology empowers managers to monitor progress in real-time and auto notifications ensure issues get resolved quickly.

One solution does it all

LOGIT

Logit is the most flexible mobile-first solution for the entire business. Spend less time sending emails, making phone calls and searching for missing paperwork. One end-to-end digital platform makes it easy for you to manage tasks and teams more efficiently from any mobile device.

- Guest Feedback
- Action Management
- Team Chat
- Document Management

Business Intelligence

- Real-Time Analytics
- Automated Insights
- Performance Tracking

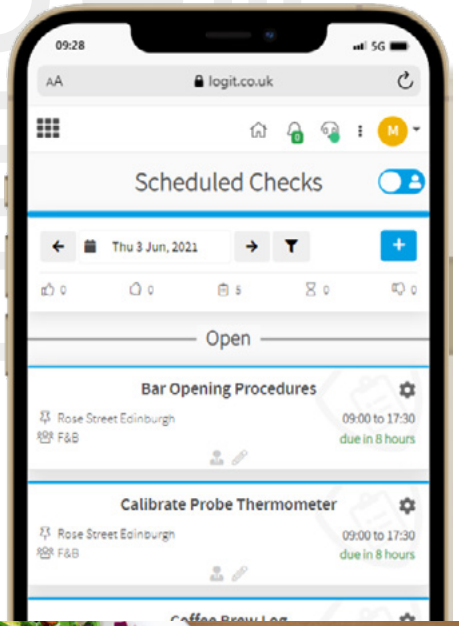
Leave it to Logit for improving efficiencies and productivity

Why use multiple solutions and manual processes when all you need is one platform to manage tasks, track progress, report on performance and promote collaboration across the organisation?

The only system you'll ever need.

"What sets Logit apart from other solutions is that it rolls everything into one system, providing access to whatever team members need with the touch of a button."

LOGIT



Digital Checklists

The most advanced checklist application transforms day-to-day operations.

- Assign team members to specific tasks and access to relevant documentation.
- Receive auto notifications when a task is not completed on time or an issue exists that needs corrective action.
- Notify the right stakeholders based on parameters you set up in the system to ensure no finger pointing and quick resolution.
- Track progress and identify areas for improvement.

"One of the great things about Logit is that it has given the kitchen team confidence knowing all food safety and compliance activities can be easily accessed and monitored in one place."

Food Safety

Achieve your 5 star rating by improving compliance and safety standards.

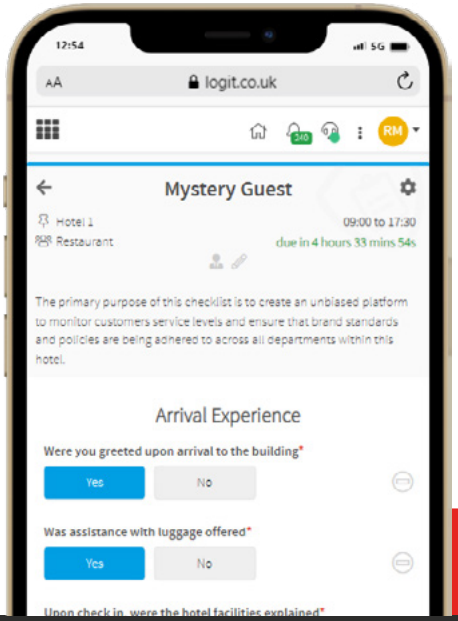
- Automate temperature checks and monitoring with smart sensors and wireless probes.
- Assign repeatable tasks and use customisable templates to ensure staff follow procedures and stay compliant.
- Receive electronic alerts when parameters or thresholds are not met and take action to resolve potential issues.
- Auto notifications let managers know when there is an issue that needs attention and quick resolution.

LOGIT

Fire Walks & Safety

Scan, perform and monitor fire safety tasks.

- Access and store all safety records in one system.
- Scan NFC tag at check locations to provide traceability and accountability.
- Instantly report issues and ensure nothing is ever ignored or missed.
- Completed firewalks and checks are date and time stamped for complete transparency.



Scored Audits

Simplify audits and make it easier to take remedial action when issues are exposed.

- Schedule audits or perform on an ad-hoc basis.
- Analyse data instantly and gauge performance.
- Raise and track actions against each audit.
- Reduce onsite audits by half since managers do not have to spend unnecessary time checking whether company procedures are being followed.

"Audits take less time and reports give management the visibility to accurately measure performance across all our venues."

LOGIT

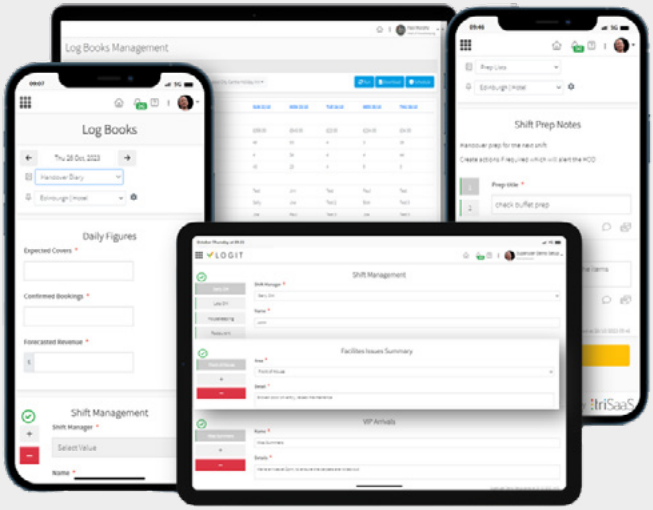
Risk Assessments

Identify, assess, manage and mitigate risks to ensure compliance and foster a secure environment.

- Streamline risk assessment and management tasks.
- Built-in control measures mitigate risks.
- Flexible risk matrix is fully customisable, allowing you to create and set parameters to suit your needs.
- Develop and maintain crisis management plans, and easily simulate emergency scenarios to test and refine your response plans.
- Leverage risk data to make informed decisions.

"Logit has made risk assessments simple to create and complete. Linking control measures to our daily tasks and scheduled audits gives me peace of mind knowing that my team is doing everything that is required to keep everyone safe."

LOGIT



Logbook

Digitise your logbooks to streamline communications and tasks.

Access, record and track daily shift notes, to-dos, follow up tasks and much more. Give managers the ability to record and communicate anything and everything without the worry that something gets missed or forgotten.

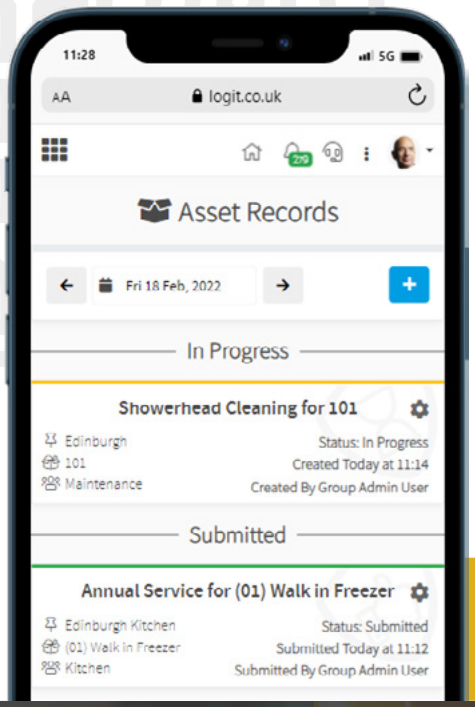
- Create shift notes, tasks & actions
- Upload pictures & documents
- Deposit drop & cash counts
- Guest details & special occasions
- Broadcast announcements
- Petty cash log
- Daily reports & instant notifications

Consultancy

Our selected partners offer a full range of consulting services to meet your needs.

- Our consultancy partners are top-grade advisors, helping to improve the profitability and overall health of your business.
- Expertise covering management, food safety, food allergens, food poisoning allegations, health & safety inspections and training.
- We can arrange your primary authority partnership to protect from inconsistent enforcement.
- Trusted industry professionals and customised solutions for any budget.

LOGIT



Reactive Maintenance

Easily manage work requests, assign tasks and improve performance.

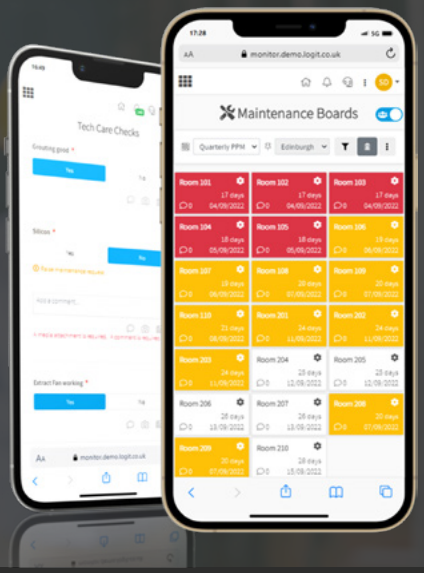
- Report issues and submit requests directly to maintenance from any hand-held device.
- Simply scan a QR code to report any maintenance issue.
- Action, delegate, track and report on issues across departments and sites.
- Improve visibility across the business by ensuring staff are kept up to date and know when something has been done.

"The system adds clarity, it's simple to use and our maintenance team are able to track jobs and repeat issues so much better and easier than we ever have done in the past."

Preventive Maintenance

Avoid downtime and reduce expensive repairs.

- Conduct and record planned inspections.
- Execute WOs from any mobile device.
- Scan QR codes to record and manage complete work order lifecycle.
- Manage asset types, history, maintenance records and cost incurred.
- Create calendar of future activities and give stakeholders confidence that maintenance is well managed.



LOGIT

Scheduled Inspections

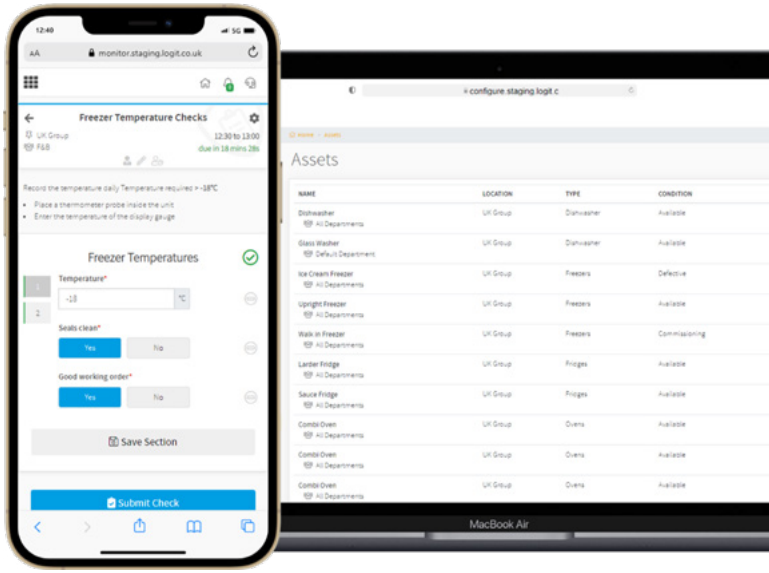
Keep your premises and assets in peak condition.

- Smart boards enable managers to schedule and allocate inspection tasks to team members.
- Automatically trigger a work order when an item is marked as 'flagged' or 'failed'.
- Detect problems early on, identify recurring problems, isolate causes and make timely corrections.
- Use inspection data to evaluate equipment durability and performance.

Asset Management

Replace paper forms and manual processes with digital workflows for ease of access and management.

- Save time finding, distributing and collecting forms.
- Automate processes that eliminate manually transferring data from paper into the system.
- Monitor creation and resolution of form submittals.
- Send notifications to the right team members based on predetermined user responses.

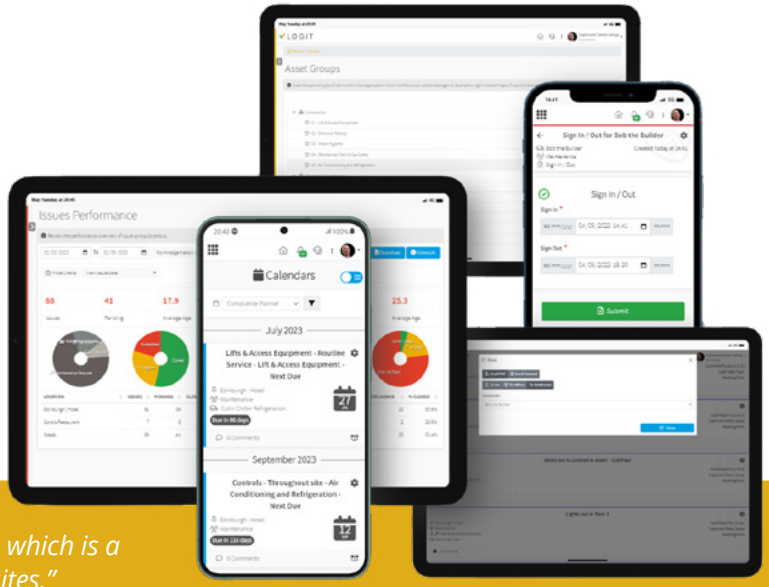


LOGIT

Contractors

Simplify contractor management from the palm of your hand.

- Link assets to contractors for auto job allocation.
- Contractor sign in / out.
- Push reactive jobs to specific contractors and auto schedule preventive maintenance visits.
- Contractor self-service certificate management.



"Our maintenance team are able to plan ahead and delegate tasks, track completion and monitor progress which is a fantastic capability especially for teams with multiple sites."

Statutory Compliance

Easily manage and track all regulatory requirements from one secure location.

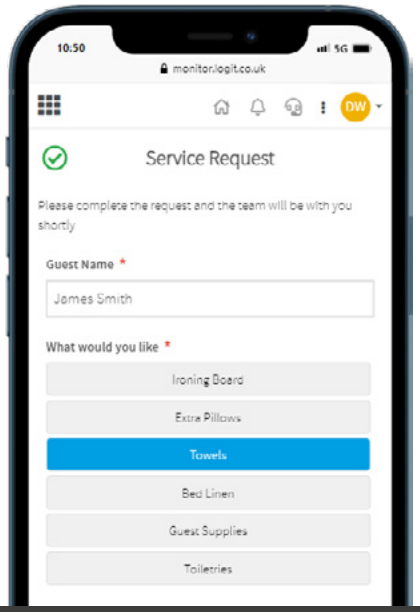
- Prompt users to complete tasks accurately and automatically escalate issues up the command to proactively resolve potential problems.
- Store forms and records of all the work, providing you with an easy to access, auditable history.
- Visibility to monitor and quickly identify issues saves time and ensures regulatory commitments are met.
    - Certifications
    - Accident reporting
    - HACCP, ISO22000, FSMA, BRCGS, SQF

LOGIT

Request Management

Automate requests and handle demands faster and more efficiently.

- Centralise communications, assign responsibility for various requests and track status at every touchpoint.
- Intelligently route requests based on your existing business rules and workflows.
- Automates service requests, maintenance requests, IT helpdesk, hotel room requests, staff & landlord requests.
- Submit and receive requests via QR codes.



"Real-time visibility allows managers to know which jobs are being done and how quickly it takes to complete them."

Incident Management

Manage incidents from occurrence to resolution.

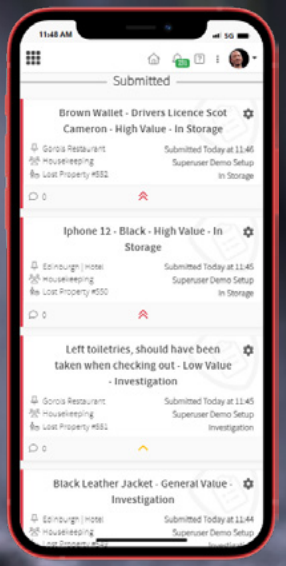
- Customisable template forms standardise reporting across sites and ensure compliance.
- Improve visibility and track issues to completion.
- Communicate progress to the entire team and keep everyone up to date.
- Save time and reduce the risk of non-compliance with streamlined reporting.

LOGIT

Lost & Found

Save time, reduce frustration and deliver memorable customer experiences.

- Simple to record lost property
- Quickly respond to queries
- Live updates of status
- Triggered reminders
- Detailed report overview
- Provide guests with an exceptional experience that keeps them coming back

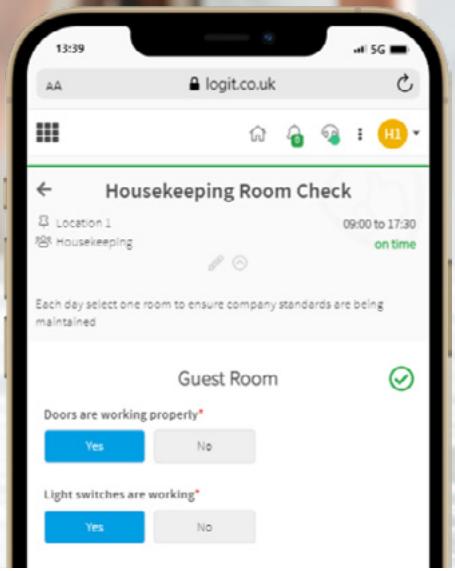


LOGIT

Hotel Housekeeping

Automate housekeeping processes to save time and monitor performance.

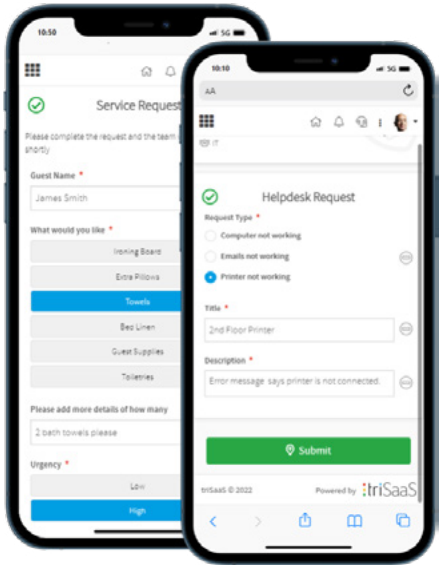
- Smart boards provide instant visibility, enabling managers to quickly allocate rooms that need servicing to team members.
- Housekeepers report when a room is ready for inspection with pictures and comments.
- Easily access cleaning guidelines and manuals from any mobile device.
- Logit's open API seamlessly updates your PMS once a room passes inspection, saving time by removing the manual rekeying of room status.



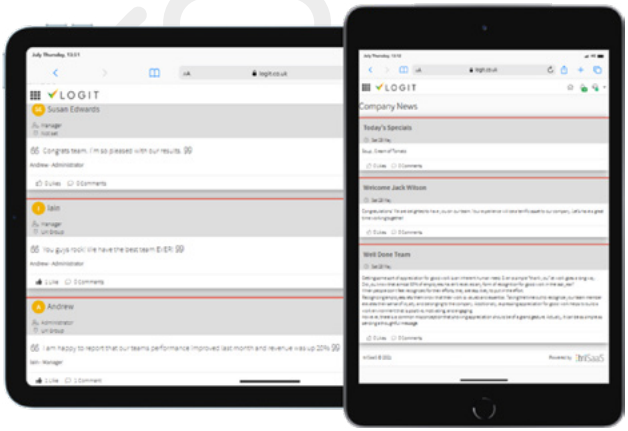
eForms

Replace paper-based forms and manual processes with digital workflows for ease of access and management.

- Automate processes that eliminate manually transferring data from paper into the system.
- Access, view and complete forms from any device anytime, anywhere.
- Monitor creation and resolution of form submittals.
- Send notifications to the right team members based on predetermined user responses.



LOGIT



Team Engagement

Empower individuals to overachieve and have a voice to contribute.

- Share information in an open and transparent manner across sites and departments.
- On-demand access to corporate news, videos, training guides and documents such as SOPs.
- Kudos lets you acknowledge team members for a job well done, motivate others to share successes.

Guest Feedback

Drive operational excellence and increase customer satisfaction.

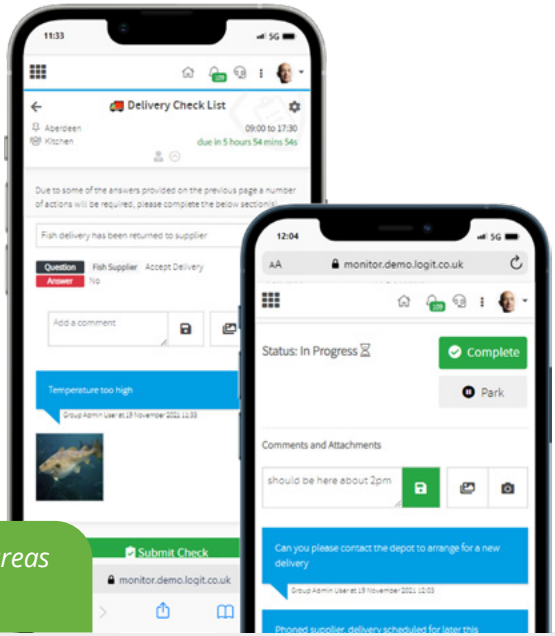
- Encourage guests to simply scan a QR code and leave feedback at various touchpoints across their journey.
- Easily identify maintenance issues by site and take measurable actions with specific timelines for quicker problem resolution.
- Address negative feedback promptly, allowing them to make adjustments to schedules and planned inspections that will improve performance.
- Drill down by site/region and make strategic decisions that improve performance, reduce maintenance costs and increase customer satisfaction.

LOGIT

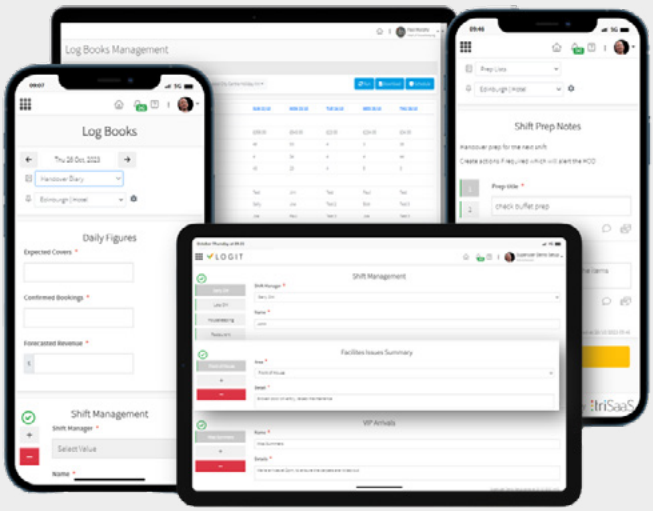
Action Management

Take the right action at the right time.

- Automatically generate actions based on specific events such as a maintenance request, scheduled inspection, missed task or checklist response that fails to meet a parameter or threshold.
- Manager or team receives auto notification with action requiring resolution based on pre-determined criteria defined by your organisation.
- Track and report on all actions.
- Easily identify trends to determine areas that require improvement.



"We chose Logit to help provide seamless communication between all areas of the business and the next level of customer service for our guests."



Logbook

Digitise your logbooks to streamline communications and tasks.

Access, record and track daily shift notes, to-dos, follow up tasks and much more. Give managers the ability to record and communicate anything and everything without the worry that something gets missed or forgotten.

- Create shift notes, tasks & actions
- Upload pictures & documents
- Deposit drop & cash counts
- Guest details & special occasions
- Broadcast announcements
- Petty cash log
- Daily reports & instant notifications

LOGIT

Team Chat

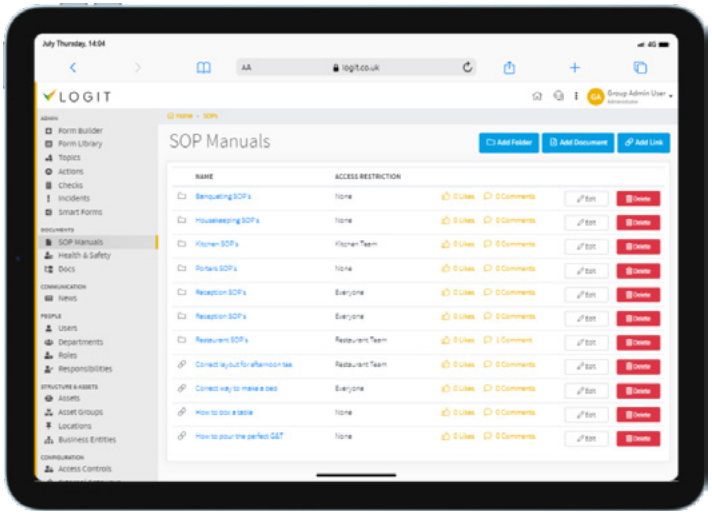
Fully integrated & affordable mobile communication solution

- Reduce admin complexity by centralising the management of users and permissions.
- Real-time notifications keep everyone informed and on track.
- One communication system for all team members
- Increase collaboration and reduce communication breakdowns.
- System retains each chat history for future reference to ensure accountability.

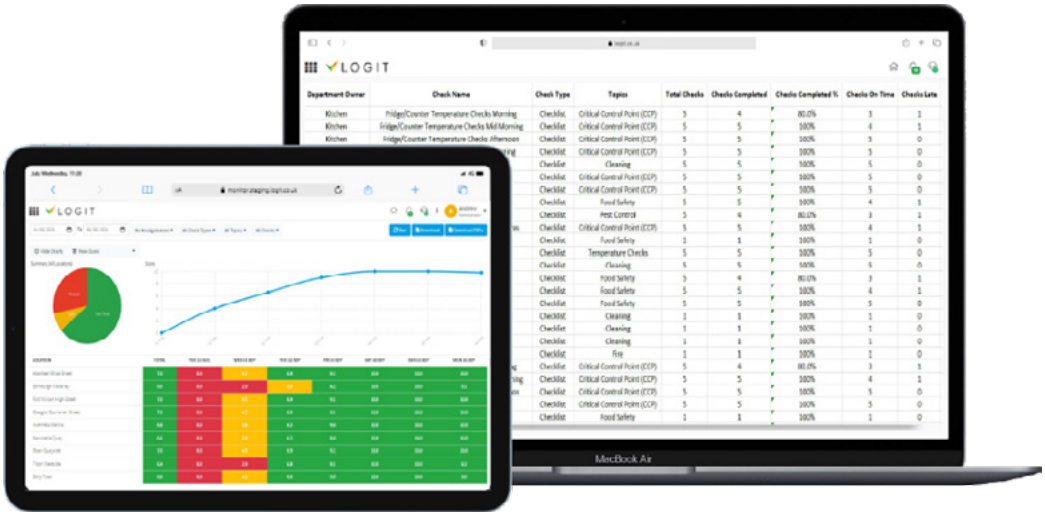
Document Management

Digitally log and manage all documents from your desktop or mobile device.

- On-demand access for team members to view documents, policies and procedures.
- Store and access pdfs, videos, photos, spreadsheets and forms.
- Assign documents to particular teams, departments or functional areas.
- Be confident everyone has access to the most current version.



LOGIT



"I love how I can run a report and quickly boil down the week – from food and fire safety to compliance."

Analytics & Reports

Real-time data enhance visibility, enabling you to take the right actions at the right time.

- Fully configurable dashboard allows you to quickly view relevant data with visual graphs, charts and tables.
- Generate custom reports to instantly track and benchmark KPIs.
- Identify key performance trends.
- Reduce costs and errors by gleaning insights that guide continuous improvements.
- Save data as pdf or other formats and share key findings with stakeholders to assess performance.

One solution does it all

LOGIT
